EXPERIENCES

Guide2Protect Insurance Web Aggregator Pvt. Ltd — Software Developer **March 2024 – Present**

- **Full Stack Developer** with hands-on experience in **Laravel, Next.js, React.js, REST APIs, and MySQL.**
- **Worked on dynamic dashboards, authentication systems, API-driven workflows, and backend**
- **Experience in deploying React and Laravel applications on AWS servers.**

PROJECTS

1. Insurance Aggregator Platform (Next.js + React + MySQL)

- Developed modules for **lead management, user roles, policy tracking, and real-time dashboards.**
- Integrated REST APIs for **policy comparison, user verification, and notifications.**
- Improved performance by optimizing SQL queries and refactoring backend logic.

2. Attendance & Payroll Management System (React + Laravel + MySQL)

- Built calendar-based employee attendance UI using React and Full Calendar.
- Developed Laravel APIs for **attendance approval, payroll computation, and reporting.**
- Implemented **secure authentication and role-based access control.**

3. Sales Analysis Panel (Laravel + HTML + CSS + Bootstrap + MySQL)

- Developed PDF/Excel report generation for **YTD & MTD growth, sales insights, and performance analytics.**
- Automated backend reporting tasks, reducing manual work and processing time.

P N Software Pvt. Ltd — Software Developer

July 2023 – Feb 2024

PROJECTS

1. Blockchain Admin Panel (React + Redux + HTML/CSS + Bootstrap)

- Built reusable React components with optimized state management using Redux.
- Converted Figma UI designs into responsive, production-ready interfaces.
- Integrated REST APIs for dashboard operations.

2. Blockchain Dapp Integration (Web3.js + Solidity)

- Connected Ethereum-based smart contracts with React using Web3.js.
- Implemented wallet connection, transaction handling, and contract calls.

Code Partner IT Solutions Pvt. Ltd — Junior Developer

May 2022 – July 2023

PROJECTS

1. Dapp Application (Web3.js + Solidity)

- Developed blockchain modules using Ethereum, Web3.js, and Solidity.
- Implemented wallet transactions, token logic, and contract testing.

2. Airdrop UI (React + Web3.js)

- Built responsive Airdrop UI using React.
- Integrated smart contracts for secure token claiming workflows.

SKILLS

- **Languages:** PHP, JavaScript, HTML, CSS.
- **Frameworks and Libraries:** Laravel, Next, React, Bootstrap.
- **Database:** MySQL.
- **Tools and Technologies:** Postman, Git, VS Code.
- **Concepts:** MVC, Redux, REST APIs, OOPs, Client-Server Architecture.

EDUCATION

UNIVERSITY OF ENGINEERING AND MANAGEMENT, KOLKATA

B.Tech in Computer Science Engineering (2018 – 2022) | CGPA: 8.40.
